CONFERENCE PROGRAM

2016

Hyatt Regency Coconut Point
Bonita Springs, Florida
October 12-14, 2016
www.orexcellence.com

Sponsored by
Outpatient Surgery
IMPORTANT SAFETY INFORMATION

OMIDRIA (phenylephrine and ketorolac injection) 1% / 0.3% must be added to irrigation solution prior to intraocular use.

OMIDRIA is contraindicated in patients with a known hypersensitivity to any of its ingredients.

Systemic exposure of phenylephrine may cause elevations in blood pressure.

Use OMIDRIA with caution in individuals who have previously exhibited sensitivities to acetylsalicylic acid, phenylacetic acid derivatives, and other nonsteroidal anti-inflammatory drugs (NSAIDs), or have a past medical history of asthma.

The most commonly reported adverse reactions at 2-24% are eye irritation, posterior capsule opacification, increased intraocular pressure, and anterior chamber inflammation.

Use of OMIDRIA in children has not been established.

INDICATIONS AND USAGE

OMIDRIA is added to ophthalmic irrigation solution used during cataract surgery or intraocular lens replacement and is indicated for maintaining pupil size by preventing intraoperative miosis and reducing postoperative ocular pain.

Please see the Full Prescribing Information at www.omidria.com/prescribinginformation.

*Individual insurance coverage and policies may vary, and Omeros does not guarantee insurance coverage or payment. Omeros offers payments under the OMIDRIAssure “We Pay the Difference” program on behalf of qualifying patients. OMIDRIAssure is subject to change without notice.

Welcome to Florida!

Thanks for attending the OR Excellence meeting this year! Our hope is to send you home on Friday with a notebook full of fresh, practical, valuable advice that you can use immediately, the names and numbers of new friends and professional contacts and a glow from all the fun you’ve had with your colleagues.

Just a few notes before you start the conference:

• The best learning goes two ways, and that’s why this meeting is interactive. When you enter most sessions, you’ll receive a small audience-response remote-controlled device that will let you answer questions our presenters pose. Don’t worry—it’s really easy to use and anonymous. Please make sure you leave your keypad in the classroom at the end of the day!

• When the workday is over, the fun begins. Please join us on Wednesday afternoon in the exhibit hall at 5:15 p.m., to network, shop and enjoy our free wine tasting courtesy of the OR Excellence exhibitors.

Thursday evening, the fun continues with Margarita Madness! Join us in the exhibit hall for a fun reception featuring decadent specialty tropical drinks poured by the exhibitors.

• OR Excellence is your meeting. It is based 100% on advice and feedback from Outpatient Surgery readers. We’re counting on you to tell us what you like and what needs improvement so that we can make it that much better for 2017 in Las Vegas, Nevada. Outpatient Surgery team members are wearing the special badges marked STAFF—please let us know if we can help in any way while you are here, and share any thoughts you have about the meeting or the magazine!

• During the breaks, please be sure to visit our fabulous sponsors and exhibitors in the exhibit hall, and if you like the meeting, thank them! Without our exhibitors, OR Excellence would not be possible.

• Mark your calendar for OR Excellence 2017 in Las Vegas, Nevada, October 11-13, 2017, at the fabulous Red Rock Casino, Resort and Spa.

Thank you again. Please have a wonderful time here in Bonita Springs. We look forward to our time together.

Sincerely,

Stan Herrin  
Publisher

Dan O’Connor  
Editor-in-Chief
When it comes to the Ambulatory Surgery Center, Our Aim is your Triple Aim

By leveraging across our unique portfolio of products and solutions, you can enhance the Triple Aim performance of your ASC business (Improved Outcomes, Greater Patient Satisfaction, Reduced Total Costs).

And when it comes to Total Joint Reconstruction in the ASC, we are developing materials to help you build a successful outpatient strategy for TJA.

Find out more online at DePuySynthesAdvantage.com.
B. Build a World-Class Outpatient Total Joints Program | PINE

Andrew Stoockl, MD Excelsior Orthopaedics, Amherst, N.Y., Nicholas J. Violante, DO, Excelsior Orthopaedics, Surgeon, David Uba, Excelsior Orthopaedics, Chief Executive Officer, Jeannette Moretti, RN, CNOR, Administrator, Buffalo Surgery Center, Amherst, N.Y.

In the next 15 years, the total joint replacement market will quadruple in size and dramatically change in scope, with well over half of all cases likely to be done on an outpatient basis. This workshop will show you how to build a successful same-day total joint program from the ground up. You’ll learn from healthcare commentator and renowned Johns Hopkins surgeon Marty Makary, MD, who has studied price transparency and will explain the positive impacts on surgical facilities that have posted their prices online. Plus you’ll hear from Andy Poole, MS, the CEO of Monticello Community Surgery Center in Charlottesville, Va., who believes patients deserve honest and upfront pricing for the procedures they undergo, and Vangie Dennis, RN, BSN, CNOR, CMLSO, who developed the online pricing structure used at Spivey Station Surgery Center in Jonesboro, Ga.

A. Why and How to Post Your Prices Online | SANIBEL

$6335 for an ACL repair. $2850 for cataract surgery. It’ll soon be the norm for surgical facilities of all kinds to post their all-inclusive prices for various procedures online. It’s called price transparency, and it’s a mega-trend impacting the business of surgery in a major way. This workshop will show you step-by-step how to do it and what it could mean for your facility. You’ll hear from healthcare commentator and renowned Johns Hopkins surgeon Marty Makary, MD, who has studied price transparency and will explain the positive impacts on surgical facilities that have posted their prices online. Plus you’ll hear from Andy Poole, MS, the CEO of Monticello Community Surgery Center in Charlottesville, Va., who believes patients deserve honest and upfront pricing for the procedures they undergo, and Vangie Dennis, RN, BSN, CNOR, CMLSO, who developed the online pricing structure used at Spivey Station Surgery Center in Jonesboro, Ga.

Why Add Microbes to Your Mop Bucket?

The truth is that microfiber really works best the first time it’s used.

After that, it’s just a magnet for nasties—Hair, lint, fungi, mold, even spores—recirculating through the laundry.

Microfiber, while great at grabbing up bioburden from hospital floors or surfaces, is terrible at letting go even when washed. So why take that risk with tonight’s OR terminal cleaning?

PREMIRA® Microfiber Pads are revolutionary. New microfiber every time because our products are disposable. Superior bioburden removal and liquid sorption every time because PREMIRA products are single use. And white in color because they can be, unlike those fuzzy,graying mops that hide dirt and microbes in your laundry bins.

So simplify your cleaning life, EVS and OR Techs! Eliminate logistical headaches, Purchasing Managers! Get cleaner environmental surfaces, Infection Preventionists! And rest easier nursing staff and patients, because the Single Use Revolution is coming.

PURIST

Designed for Anterior THR

The next-generation leg positioning system is designed to boost efficiency and surgeon control throughout the anterior THR procedure.

Contact us at (409) 658-1017 ... it only takes one call to setup a product trial.

Attractive lease and rental options available.

Learn more at Booth 314
Busy OR teams enjoy the PURIST’s quick setup, small footprint and staff-friendly operation.

Combine the PURIST with any standard operating table to build a superior leg positioning system.

Watch our educational videos on the next-generation PURIST.

Fagron Sterile Services (FSS)/JCB, a new 503B Human Drug Outsourcing Facility utilizing innovative features never before seen in the sterile compounding industry, is the next generation of compounded sterile productions for Ophthalmic • Pain • Dialysis • Drug Shortages • IV Admixture. You and your patients deserve nothing less.

The NEW 50,000-square-foot facility, among the largest in the country, will deliver the highest level of safety by combining JCB’s experience and culture of quality along with custom robotic equipment, unidirectional flow of products and personnel, and individual fill suites. It will also feature closed-system sterile filling machines, continuous environmental monitoring of all areas of production and redundant operating systems. Our new facility will also allow us to offer new IV Admixture products, such as OR syringes.

1 p.m. **Patient Safety: 54 Years of Progress ... or Stasis? | ESTERO BALLROOM**

It’s disheartening, says anesthesiologist and patient safety expert Kenneth P. Rothfield, MD, MBA, CPE, CPPS, how little we’ve improved patient safety during his lifetime. More than 400,000 U.S. citizens die from preventable medical errors each year. That’s well more than 1,000 preventable deaths a day. In his uniquely engaging way, Dr. Rothfield plots the progress — or lack thereof — we’ve made on a 54-year timeline and challenges surgical leaders to solve the never events that keep happening. Kenneth P. Rothfield, MD, MBA, CPE, CPPS, Saint Vincent’s Healthcare, Jacksonville, Fla.

2 p.m. **What Can Surgical Facilities Learn From the Ritz Carlton and Other World-Class Corporations? | ESTERO BALLROOM**

The pressure to attract patients and surgeons to your surgical facility has never been greater than it is today. This program will examine successful business models outside the healthcare setting that use excellent customer service to attract new customers and keep current customers happy. We’ll explain how to implement these customer-focused strategies in a surgical facility and offer methods you can use in your ASC or hospital to enrich both the patient and the surgeon experience. Vangie Dennis, RN, BSN, CNOR, CMLSO, Emory Healthcare, Atlanta, Ga.

3 p.m. | **BREAK**

3:15 p.m. **How to Resuscitate a Dying Surgical Facility | ESTERO BALLROOM**

In 2009, the Delray Beach (Fla.) Surgery Center was on its deathbed. It had been sold several times and was on the verge of foreclosure. But the prospective new owners recognized that there was still potential — in the right hands. They recruited Carol Cappella, RN, MSN, CNOR, a former hospital administrator, to bring it back to life. Ms. Cappella will explain how she embraced the challenge and helped turn the previously moribund facility into the thriving center it is now. Carol Cappella, RN, MSN, CNOR, Delray Beach (Fla.) Surgery Center

4:15 p.m. **Medical Care Gone Wrong | ESTERO BALLROOM**

Medical errors account for approximately 250,000 patient deaths each year, making them the third leading cause of death in the United States. What can surgical facilities do to fix the problem? Marty Makary, MD, MPH, Johns Hopkins Hospital, Baltimore, Md.

5:15 | **Wine Tasting in the Exhibit Hall | CALUSA BALLROOM**

Treat your taste buds, network with colleagues and see new technology at our annual wine tasting on Wednesday night. This event has been a favorite of ORX attendees for seven years running!
Congratulations to our
2016 OR Excellence Award winners!

Booth 223

Come Visit our booth at OR Excellence!
THURSDAY, OCT. 13

7:30 a.m. – 8 a.m. | Continental Breakfast | ESTERO FOYER

8 a.m. Every ½ Second Counts: A Victim’s Perspective on Patient Safety | ESTERO BALLROOM

After a tragic car accident that took his wife in 2004, Ridley’s 17-month-old son, Josh, was killed by a medication error at the hospital where he was cared for after the accident. Instead of getting angry, Mr. Barron chose to use the experiences as a platform for challenging individuals and institutions to put patient safety first. Mr. Barron has taken personal tragedy and used it for good — and reminds you that in an instant we can make life-changing decisions. Ridley Barron, Ridley Barron Industries, Thompson’s Station, Tenn.

9 a.m. What If a Killer Walked Into Your Facility? | ESTERO BALLROOM

Is your facility prepared for the unthinkable? Two days before Thanksgiving in 2013, a bizarre stabbing spree shattered the sense of safety and security at a Texas surgical center. A family member of a patient stabbed 5 people during a 30-second rampage in the waiting room and clinical areas. Two people, including a PACU nurse, died. Could this happen at your facility? Learn how to guard against healthcare workplace violence from a first responder, including several security measures you should consider implementing at your facility. Beth Chrismer, MSN, RN, Good Shepherd Ambulatory Surgical Center, Longview, Texas

10 a.m. | Coffee Break in the Exhibit Hall | CALUSA BALLROOM

10:45 a.m. Healthcare Leaders Aren’t Born, They’re Made | ESTERO BALLROOM

They didn’t teach you how to lead at the highest levels in nursing school. But that’s exactly what’s required to keep advancing in your career and to keep your facility in good financial and operational health. This crash course will help ignite the most important personal leadership qualities of today's nurse leaders so that surgeons and staff alike will view you as a “Most Valuable Player.” David Taylor, MSN, RN, CNOR, Methodist Hospital, San Antonio, Texas

11:45 a.m. | OR Excellence Awards | ESTERO BALLROOM

12:00 p.m. | Lunch | CALUSA TERRACE

12:30 p.m. | Dessert, Shopping in Exhibit Hall | CALUSA BALLROOM
Presurgical hair removal: Can the risk of HAI be reduced?

Hair removal—when needed to prepare the skin prior to certain procedures—is important in the prevention of hospital-acquired infection (HAI). Recommended by several guidelines, the clipping method has broad support for promoting patient safety. Acceptance of these recommendations is now very high, with 98% of surveyed OR staff reporting compliance with clipping vs shaving. However, the cleanup of surgical hair clippings remains a hot infection prevention topic; in the same survey of 250 AORN participants, complete removal of clipped hair was ranked as important as the control of OR traffic in improving surgical outcomes.

Clippings, cleanup—and cross-contamination?

Hair clippings, which contain the same pathogenic bacteria as skin, can be left behind on patients, linens and the floor. HAI outbreaks have been traced to organisms isolated from hair or the scalp. While adhesive tape is commonly used to cleanup hair clippings, there’s evidence for an associated risk of cross-contamination. In one study, 74% of used adhesive tape rolls exhibited potentially pathogenic bacteria, and on some tape rolls, these colonies were too numerous to count. In another study, 100% of adhesive tape rolls cultured 1–7 days after initial use were contaminated with Pseudomonas, E. coli, Klebsiella, Enterobacter and coagulase-positive staphylococci. And, about 20% of the tape rolls migrated to at least one different location in the unit. Furthermore, adhesive tape and sticky mitts have been shown to strip skin and cause microabrasions, increasing the risk of infection. Clearly there is a need to advance the cleanup method of hair clippings.

The ClipVac™ hair removal system eliminates clipping cleanup—and promotes HAI prevention.

A recent innovation in infection prevention is vacuum-assisted surgical clipping with the ClipVac hair removal system. ClipVac is the one-step solution for more effective and efficient surgical hair cleanup that eliminates the need for tape or mitts. A small, portable vacuum with a single-use vacuum tip and filtered reservoir, ClipVac attaches to CareFusion surgical clippers to create a complete hair removal system. ClipVac captures hair clippings as the hair is cut at the source. An average of 98.5% of the clipped hair and debris are captured by the filter, which is then disposed of after each use, thereby eliminating the risk of cross-contamination associated with adhesive tape cleanup.

THURSDAY, OCT. 13 (cont’d)

1:30 p.m. | WORKSHOPS

A. 25 Creative Cost-Saving Solutions | SANIBEL

If improving your bottom line is tops on your to-do list, then this is the workshop for you. When you return to your facility, you’ll be armed with practical ways to cut costs without sacrificing quality or compromising patient care. You’ll hear real-life solutions from Thomas Durick, MD, the medical director and chief of anesthesia at Bay Surgery Center in Oakland, Calif., and Leslie Mattson, RN, BSHM, a surgery center consultant from Atlanta, Ga.

B. How to Transform Your Facility into a “High Reliability” Organization | PINE

Human error is inevitable — it’s part of how the mind works. We can’t change that, but we can correct for it, before error ever has a chance to harm patients. It’s called “High Reliability.” Here’s how it works. Former Coast Guard pilot and safety officer Spence Byrum, who has spent nearly 25 years in the fields of safety and process improvement, tells you the keys to eliminating avoidable errors. Spence Byrum, HRS (High Reliability Solutions) Consulting, Weston, Fla.

C. How to Avoid an Infection Control Disaster | CAPTIVA

Operating rooms and sterile processing departments are the new ground zero in the fight against dangerous and sometimes deadly healthcare-acquired infections. They’re also where unwanted national headlines are being made. In this interactive training session, infection preventionist Donna Nucci, RN, CIC, MS, discusses hot topics in SSI prevention bundles, endoscope reprocessing best practice updates as well as the additional challenges in the procedure area. She’ll also touch on compliance in surgical attire, safe injection practices, preventing cross-contamination and hand hygiene. You won’t want to miss this infection prevention boot camp. Donna Nucci, RN, CIC, MS, Yale New Haven Hospital, New Haven, Conn.

3:30 p.m. Tournament of Champions | ESTERO BALLROOM

Our popular surgical game show that tests your perioperative knowledge is back! Get ready to buzz in with the correct answer. We’ll award a special prize to the winning team members. Hosted by industry veterans Ann Geier, MS, RN, CNOR, CASC, and Stephanie Martin, BSN, RN, CNOR, CASC.

4:30 p.m. – 6 p.m. Cocktail Party in the Exhibit Hall

CALUSA BALLROOM

…and shopping for your facility. Join us in the exhibit hall on Thursday night for a fun reception featuring decadent — and complimentary — specialty tropical drinks poured by the exhibitors. Sip on exotic blends while picking up ideas to make your facility hum.
Comfort each step of the way!

**PRE-OP**

soothingscents.com
FRIDAY, OCT. 14

7:30 a.m. – 8 a.m. | Continental Breakfast | ESTERO FOYER

8 a.m. **Five Days at Memorial: Life and Death in a Storm-Ravaged Hospital** | ESTERO BALLROOM

Hear from *New York Times* bestselling author and Pulitzer Prize winner Sheri Fink, PhD, MD, whose book, *Five Days at Memorial*, describes the events that took place at Memorial Medical Center over 5 days following Hurricane Katrina, as thousands of people were trapped in the hospital without power. The triage system put into effect deprioritized critically ill patients for evacuation, and a number of these patients were euthanized by medical and nursing staff shortly before the entire hospital was evacuated on the fifth day of the crisis. Dr. Fink examines the legal and political consequences of the decision to euthanize patients and the ethical issues surrounding euthanasia and health care in disaster scenarios. Sheri Fink, PhD, MD (Photo credit: Jen Dessinger), Author, *Five Days at Memorial*

9 a.m. **True Detective: Uncovering the Real Root Cause** | ESTERO BALLROOM

Investigating adverse events can be difficult and deceptive. The cause might initially appear to be obvious, but a broader look can often unveil issues in your organization that you didn’t even know existed. In this entertaining presentation, Jan and Carmen will show how looking at problems from a narrow perspective can alter your perception and cause you to miss the real root cause. Things are not always as they seem. Jan Kleinhesselink, RN, CPHQ, Chief Quality Officer, Lincoln (Neb.) Surgical Hospital, Carmen Lester, RN, JD, Chief Clinical Officer, Lincoln (Neb.) Surgical Hospital

10 a.m. | BREAK

10:15 a.m. **Fear: The Hidden Killer** | ESTERO BALLROOM

Why is it that most errors at hospitals go unreported? Despite the existence of incident reporting systems, surgical staff rarely report adverse events. They’re convinced that keeping quiet is the best way to preserve relationships and get work done. Nothing can be more deadly than silence. In this thought-provoking presentation, Dr. Wyman, a physician, educator and nationally recognized speaker, discusses organizational fear and its impact on organizational behavior with a focus on quality and safety. Don’t let silence shatter the safety of your operating rooms. Chet Wyman, MD, Johns Hopkins University School of Medicine, Baltimore, Md.

11:15 a.m. **Addiction & Abuse: Medicine’s Dirty Little Secret** | ESTERO BALLROOM

Our society is afflicted with alcoholism and addiction to prescription pain medication. The incidence of substance abuse in surgery, both doctors and nurses, might be higher than 10%. Chances are, you know someone in the throes of substance addiction or abuse of opioids or alcohol. Find out how prevalent the problem is among surgical professionals and how to help a colleague — or yourself — out of the grips of addiction. Ashish C. Sinha, MD, PhD, DABA, MBA, Drexel University College of Medicine, Philadelphia, Pa.

Modern Post-Surgical Pain Management

(844) PAIN-123
Ridley Barron

Ridley Barron is a pastor, author, internationally known speaker and tireless advocate for patient safety. After a tragic set of circumstances that touched his family’s life, Ridley began a journey of healing that included speaking and writing about the horrible circumstances that harmed his family. He speaks with great candor about the events of that fateful day. He has appeared at hospitals, medical conferences, churches and meetings of various professional health organizations from coast-to-coast. His story has been published in numerous magazines and medical publications, and was also told in great detail with the long-awaited release of his book, “Twist of Faith.” Ridley’s story is one of hope, healing and forgiveness and a call for continued improvement in patient safety. He lives today with his wife, Lisa, and their 4 children in Thompson’s Station, Tenn.

Spence Byrum

As a former pilot and safety officer for the U.S. Coast Guard as well as a process improvement expert, Spence Byrum has studied the inevitability of human error, why it occurs and how it can be prevented. As co-founder and CEO of HRS (High Reliability Solutions) Consulting in Weston, Fla., he has helped more than 600 healthcare facilities implement the protocols and practices of commercial aviation, nuclear power plants and other high reliability organizations in order to protect patients from harm when human error occurs.

Carol Cappella, RN, MSN, CNOR

Carol Cappella is the clinical director of the Delray Beach (Fla.) Surgery Center. She has more than 30 years of experience in acute care hospitals and health systems, including 20 years in leadership roles. She was working as a consultant before she accepted the challenge of trying to turn things around at Delray Beach.

Beth Chrismer, MSN, RN, CPHRM

Beth Chrismer was executive director for risk management at Good Shepherd Medical Center in Longview, Texas, when a patient’s rampaging son unexplainably stabbed 5 people, killing 1 OR nurse and 1 visitor, at its ambulatory surgical center in November 2013. Ms. Chrismer has since spoken frequently on armed violence in the healthcare setting. She has more than 35 years of experience in healthcare, including 15 years in healthcare risk management. She is also a certified yoga teacher.

Vangie Dennis, BSN, RN, CNOR, CMLS0

Vangie Dennis is the director of patient care practice at the Emory Clinics Ambulatory Surgery Centers in Atlanta, Ga., as well as the laser safety officer for the Emory Health System. With more than 40 years of nursing experience, she has lectured nationally and internationally on clinical practices, advanced technologies, endoscopic procedures and surgical laser use. In 2011, she received the AORN Award for Outstanding Achievement in Perioperative Clinical Nursing Education. Ms. Dennis is a longtime member of the Outpatient Surgery Magazine Editorial Board.

Thomas W. Durick, MD

Dr. Thomas Durick is the medical director and staff anesthesiologist of the Bay Surgery Center in Oakland, Calif. Dr. Durick has given multiple presentations over a wide range of topics, including cost containment in the operating room, quality improvement and neuromuscular blockade.

Sheri Fink, PhD, MD

Dr. Sheri Fink is a New York Times bestselling author and Pulitzer Prize winner for her book, “Five Days at Memorial: Life and Death in a Storm-Ravaged Hospital,” a landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina. She’s also the author of the book “War Hospital: A True Story of Surgery and Survival.” Dr. Fink holds a medical degree and a doctorate in neuroscience, both from Stanford University. She is a New York Times health and science correspondent. [Photo: Jen Desinger]

Ann Geier, MS, RN, CNOR, CASC

Ann Geier has been a leader in the ASC industry for more than 30 years. She’s currently vice president of clinical informatics and surgery at Source Medical Solutions and a highly respected voice in ambulatory surgery center management. Her clinical background was based in the operating room, where she served as a scrub nurse, circulator, educator and director.

Jan Kleinhesselink, RN, CPHQ

As the chief quality officer at Lincoln (Neb.) Surgical Hospital, Jan Kleinhesselink oversees quality improvement, safety and infection control efforts. She also investigates adverse events to determine root causes and recommends how the hospital can mitigate its liability risk. Ms. Kleinhesselink, who has been in surgical leadership roles for more than 25 years, is also a surveyor for the Accreditation Association for Ambulatory Health Care (AAAHC).

Carmen Lester, RN, JD

Carmen Lester is the chief clinical officer at Lincoln (Neb.) Surgical Hospital, where she manages the leadership of several departments, including outpatient surgery and surgical services. She earned a degree from the University of Nebraska College of Law and her nursing degree from Nebraska Wesleyan University. Ms. Lester is a member of the American Organization of Nurse Executives, the American College of Healthcare Executives and the Healthcare Financial Management Association.

Marty Makary, MD, MPH

Dr. Marty Makary is the surgical director of the Johns Hopkins Multidisciplinary Pancreatitis Center, the chief of minimally invasive pancreatic surgery at Johns Hopkins Hospital, a professor of surgery at Johns Hopkins University and a professor of health policy and management at the Johns Hopkins Bloomberg School of Public Health. He is a nationally known patient safety advocate, a frequent TV news commentator and bestselling author of “Unaccountable,” a book about physician-led efforts to increase transparency and improve the quality of health care.

Stephanie Martin, BSN, RN, CNOR, CASC

Ms. Martin is a senior director of operations with Regent Surgical Health. Previously, she was the administrator of the Flagler Surgery Center in St. Augustine, Fla., where she expanded service lines to include GYN, general surgery and total joint replacement programs and won Outpatient Surgery Magazine’s 2012 OR Excellence Award for financial management. Earlier in her career, Ms. Martin managed daily operations and development at a specialty surgical hospital.
Meet the Speakers

Leslie Mattson, RN, BSHM
Leslie Mattson runs the popular surgical administrator’s blog “A Scrub’s Life” (ascrubslife.com). She has been managing surgery centers for 20 years and currently serves as the director of an ophthalmic surgery center. She also runs her own consulting business, ALM Surgical Solutions.

Jeanette Moretti, RN, CNOR
Jeanette Moretti has been a nurse for more than 30 years, with the last 20 years spent in management positions. She’s currently the administrator of the Buffalo Surgery Center in Amherst, N.Y., where the physicians of Excelsior Orthopaedics perform their same-day joint replacements. Ms. Moretti is in charge of managing all aspects of the surgery center, including clinical, financial and regulatory operations. She has developed multiple programs for the center, including its successful total joints program.

Donna Nucci, RN, CIC, MS
Donna Nucci is certified in infection prevention and served as the conference chair on the board of directors of APIC (Association for Professionals in Infection Control and Epidemiology) New England. As an infection preventionist at Yale New Haven Hospital, Ms. Nucci oversees more than 100 ambulatory sites, including surgery and endoscopy centers. She also works as a private consultant to more than 20 surgery and endoscopy centers in Connecticut, Massachusetts and New York, helping them meet regulatory and patient safety goals. Ms. Nucci is a frequent contributor to Outpatient Surgery Magazine.

Andy Poole, MS
Andy Poole is the CEO of Monticello Community Surgery Center in Charlottesville, Va. He received his masters of science in healthcare administration from Virginia Commonwealth University. After years of experience leading large departments at Augusta Medical Center and the University of Virginia Health System, Mr. Poole joined Monticello Community Surgery Center to focus on innovative practices and patient-focused care. In February 2016, he received board certification in healthcare management as a fellow of the American College of Health Executives.

Sanjay Prasad, MD
Dr. Prasad, an ENT surgeon and the medical director of Tower Surgical Center, in 2007 founded SurgiPrice, an online bidding platform for patients in need of surgery, dental procedures or diagnostic imaging. Patients upload their pertinent medical records, and providers and facilities report back quality metrics and bundled pricing. Patients then choose providers based on quality and price.

Kenneth Rothfield, MD, MPA, CPE
Kenneth Rothfield is system vice president and chief medical officer at Saint Vincent’s Healthcare in Jacksonville, Fla. He is nationally recognized for his work in patient safety with the High Reliability Steering Committee of Ascension Health, the nation’s largest not-for-profit healthcare system, and the Institute for Healthcare Communication.

Ashish C. Sinha, MD, PhD, MBA
Dr. Ashish Sinha developed an interest in substance abuse among medical professionals after witnessing 2 of his colleagues suffer from drug addiction. The vice chairman of the anesthesiology and perioperative medicine department at Drexel University College of Medicine in Philadelphia, Pa., and a board-certified anesthesiologist practicing at Hahnemann University Hospital in Philadelphia, Dr. Sinha has also served as president of the International Society for the Perioperative Care of the Obese Patient and a co-author of “Lippincott’s Anesthesia Review: 1001 Questions and Answers.”

Andrew C. Stoeckl, MD
A graduate of Boston College and the University at Buffalo Medical School, Dr. Andrew Stoeckl joined Excelsior Orthopaedics after finishing a 1-year Harvard Sports Medicine fellowship. He received advanced training in knee, shoulder, foot and ankle injuries with an emphasis on minimally invasive arthroscopic procedures. Dr. Stoeckl is the president of Excelsior Orthopaedics and has worked to pioneer its outpatient total joint program.

David L. Taylor III, MSN, RN, CNOR
David Taylor, director of the cardiovascular OR at Methodist Hospital in San Antonio, Texas, has delivered comprehensive consulting services to community hospitals systems, teaching hospitals and Level I trauma centers nationwide, an experience that led him to author the study “Perioperative Leadership: Managing Change With Insights, Priorities, and Tools,” which was published in AORN Journal in July 2014. A former U.S. Army nurse, he retired from the branch’s nurse corps at the rank of major in 2009 after 25 years of service.

David Uba, MBA
David Uba, CEO of Excelsior Orthopaedics, is responsible for leading all aspects of Excelsior’s business, including payer contracting. Excelsior pioneered outpatient total joint replacement surgery and bundled payments in Western New York in 2014, and the program continues to grow. Before joining Excelsior, Mr. Uba held several senior leadership positions with Blue Cross Blue Shield of Western New York and a local area HMO, Mr. Uba, who has almost 30 years of healthcare management experience, received his bachelor’s degree from Fordham University in New York City and his MBA from the University at Buffalo School of Management.

Nicholas J. Violante, DO
A graduate of Saint Vincent College and the Lake Erie College of Osteopathic Medicine, Dr. Nicholas Violante joined Excelsior after completing a joint reconstruction fellowship at Allegheny General Hospital in Pittsburgh. Dr. Violante specializes in the treatment of hip and knee conditions, with expertise in total joint replacement. He has extensive training in the use of minimally invasive joint replacement procedures. Dr. Violante is a partner at Excelsior Orthopaedics and has worked to pioneer the practice’s outpatient total joint program.

Chet Wym an, MD
Chet Wym an is an anesthesiologist at Johns Hopkins Bayview Medical Center in Baltimore, where he serves as chair of both the Quality and Patient Safety Committee and the Safety Improvement Council. The co-author of “Trauma Anesthesia and Critical Care,” he has lectured extensively on effecting change and improving patient care, and is an expert in promoting teamwork and improving communication between disciplines.
AND NOW THE FUN STARTS!

Products, Services and Refreshments in the ORX Exhibit Hall

Where can you get an education about wine, tropical drinks and surgical products all in one place? The OR Excellence exhibit hall, that’s where! Learn about fantastic new products and solutions for your OR while enjoying refreshing beverages poured for you by the exhibitors themselves. The opening night wine tasting and Thursday evening Margarita Madness events are perennial favorites where you can mingle with your fellow attendees while checking out the latest in surgical products and services to make your ORs hum.

Turn the page to start your virtual tour of the OR Excellence exhibit hall floor and see what’s on display in the Calusa Ballroom. Numbers in green boxes refer to booth numbers in the exhibit hall.
**316 Cannuflow - Arthroscopy Fluid Management**

See Cannuflow’s latest advances in fluid management and access surgical efficiency and patient protection at the 2016 OR Excellence Conference. A privately held Silicon Valley-based company, Cannuflow® develops, manufactures and markets specialty arthroscopy medical products that help meet value purchasing goals and save $305 per case on average. The company’s ClearVu®, TwoVu®, EntreVu® EX, TwoVu EX, ExtravaStopper®, and SportPort® devices easily integrate into surgeons’ existing surgical techniques and solve chronic problems faced by surgeons performing knee, shoulder or hip arthroscopy. Ask Cannuflow for a copy of their new white paper on how their products can SAVE YOU MONEY by dramatically increasing efficiency and preventing arthroscopy complications!

**424 D.A. SURGICAL - ArmGuard™ Patient Arm Protector**

AORN 2016 Guidelines state that arms should not be tucked at the patient’s sides with the draw sheet. Developed for robotic and minimally invasive surgery, ArmGuard™ secures arms without tucking and allows easy positioning with quick access to ports and lines. ArmGuard™ Extended is the next generation in arm protection, and provides even more protection for the hands. Our new low-profile ArmGuard™ Rail Mounted Sleds are designed to fit any surgical table and are width-adjustable to accommodate patients with extremely high BMI. These sleds secure to the table rail and provide support for procedures requiring lateral tilt up to 20°.

**305 Surgical Notes’ Complete Revenue Cycle Solutions**

Surgical Notes is a healthcare IT solutions company dedicated to developing cutting-edge, innovative revenue cycle solutions for the ambulatory surgery center industry. Our industry leading solutions include transcription, full-service coding & coding audits, revenue cycle management, chart automation & document management, central billing office workflow, and EHR. By assimilating Surgical Notes products and services, ASCs have access to an enterprise revenue cycle solution geared toward maximizing profitability, physician disbursements, and business office efficiency. Our expert team of dedicated, experienced professionals deliver exceptional customer service in a timely and effective fashion. Experience the Surgical Notes difference today.

For more information call (888) 425-7560 or visit www.surgicalnotes.com
Mobile Instrument has been providing quality surgical equipment repair to hospitals nationwide since we pioneered the onsite repair industry in 1978. With nearly 200 mobile repair labs servicing customers coast to coast, a state-of-the-art repair facility in Ohio, and satellite facilities in Tennessee and Southern California, we remain the nation's largest and most trusted provider of surgical equipment repair. A few reasons why…

• We repair items tagged as “non-repairable” by the OEM or other repair vendors.
• We carry the industry’s largest inventory of replacement parts.
• We maintain the nation’s largest inventory of no-charge loaner equipment.
• We are independent and accountable.

For more information call (800) 722-3675 or visit www.mobileinstrument.com

Introducing the VitaHEAT® UB3: The Always On Patient Warming Solution

VitaHEAT® UB3 is a breakthrough innovation in under-body patient warming using patented conductive ink technology in a thin mattress design. VitaHEAT® UB3 is safe and effective, easy to use, and cost efficient. With portable battery and plug-in AC accessories available, it’s always on and can be used throughout all perioperative phases.

VitaHEAT® Medical is dedicated to continually providing innovative patient warming solutions to reduce health care costs and improve patient outcomes. With over four years of product development investment, 100% of VitaHEAT’s® focus is patient warming. VitaHEAT® products are developed and manufactured in the U.S.A.

For more information call VitaHEAT® Medical, LLC (800) 850-8350 or visit www.vitaheatmedical.com

Contec - PREMIRA® Microfiber Hand and Floor Pads

Synthetic PREMIRA® Microfiber Hand and Floor Pads effectively remove fine particles and large debris without scratching sensitive surfaces in critical care areas, providing superior removal of organic material. Disposable PREMIRA pads eliminate the risk of cross-contamination and the hassle associated with both in-house and contract laundries. Compatible with the widest range of hospital disinfectants including quats, peroxides, and bleaches, PREMIRA microfiber features excellent pick-up power, providing faster, more efficient OR turnovers and use of staff. Adapt your existing hardware to our pad or use Contec’s proprietary hardw are for improved function and ergonomic ease.

For more information call (864) 503-8333 or visit www.contechealthcare.com
Xodus Medical, Inc. - Surgical BackPacks

Xodus Medical, the leader in making surgery safer, introduces Surgical BackPacks™ — a full complement of positioning products for spinal, orthopedic, and neurological procedures. Key components feature a protective layer of DermaProx™, a specially designed material that safeguards skin and sensitive tissue against shearing and pressure-related complications.

Surgical BackPacks are pre-configured to fit most tables. This innovative line of patient positioning kits can help your healthcare facility avoid preventable injuries and CMS Never Events, while maximizing patient safety and minimizing non-reimbursed care costs.

For more information call (800) 963-8776 or visit www.xodusmedical.com

OMIDRIA® (phenylephrine and ketorolac injection) 1% / 0.3%

OMIDRIA is the only FDA-approved intraocular product to maintain pupil size and to reduce postoperative ocular pain in cataract surgery patients. It also is the only NSAID-containing product FDA-approved for intraocular use. OMIDRIA is preservative/bisulfite-free, and ocular adverse reaction rates are similar to those of placebo. While not included in Phase-3-trial endpoints or in labeling, post-launch case-controlled studies show that OMIDRIA, compared to epinephrine, reduces complication rates, decreases use of pupil-expanding devices, shortens age-adjusted surgical times and improves uncorrected visual acuity on the first postoperative day, all with statistical significance. OMIDRIA is separately reimbursed by Medicare and other payers (HCPCS: C9447). OMIDRIA is contraindicated in patients with known hypersensitivity to its ingredients. Systemic exposure of phenylephrine may cause elevations in blood pressure. Prescribing Information: www.omidria.com/prescribinginformation.

For more information call (206) 676-5000 or visit www.omeros.com

When it comes to Outpatient Solutions, our aim is your Triple Aim.

By leveraging across our unique portfolio of products and solutions, you can enhance the Triple Aim performance of your ambulatory surgical center (ASC) (Improve Outcomes, Greater Patient Satisfaction, Reduce Total Costs).

And when it comes to Total Joint Reconstruction in the ASC, we are developing materials and providing educational opportunities to help you build a successful outpatient strategy.

Gojo Industries, Inc. - Purell & Provon

GOJO Industries, Inc., inventors of PURELL®, is committed to improving the well-being of patients and healthcare workers. Together with infection-prevention professionals, we’re reducing infection rates and improving patient outcomes. With our leadership brands PURELL® and PROVON®, we are focused on bringing innovative hand hygiene products, smart dispensing solutions and behavior-based compliance-building programs to market that help reduce the spread of infections and improve hand hygiene compliance.

For more information, call (800) 321-9647 or visit healthcare.gojo.com

IOT Purist Leg Positioning System

In January of this year, IOT launched a next-generation leg positioning system designed to boost efficiency and surgeon control throughout the anterior THR procedure.

Combine the PURIST with any standard operating table to build a superior leg positioning system that can outperform the cumbersome ortho tables currently used.

The PURIST offers a small OR footprint of 2 x 3 ft. Its quick setup, ergonomic design and staff-friendly operation make the PURIST popular with busy OR teams.

Attractive lease options are available (12-36 months). Please contact us at info@iotiot.com to arrange for a trial of the newest leg positioning system.

For more information call (409) 658-1017 or visit www.iotiot.com/purist

Quick-Drain™ by Bemis

Quick-Drain™ Waste Management Systems provide safe and cost-effective disposal of liquid infectious waste. Quick-Drain satisfies OSHA’s Bloodborne Pathogen Standard for removing infectious waste risks in the workplace. Two separate systems utilize both Bemis Hi-Flow Rigid Suction Canisters and Quick-Fit™ Suction Liners. These systems quickly drain infectious waste into the sanitary sewer at a rate of 500cc per second, saving staff time. Quick-Drain saves money by reducing red bag waste and eliminating per-use disposal costs such as solidifiers and other disposables. It connects to existing plumbing and requires no electricity. A version is available to drain any large volume canister (12000cc or above).

For more information call (800) 558-7651 or visit www.bemishealthcare.com
Collect Rx: Out-of-Network Collection Service

Collect Rx, Inc. provides services to hospitals, ambulatory surgical centers, physicians, and other healthcare providers to maximize reimbursements on out-of-network bills. Utilizing its proprietary CRXIS business intelligence engine and extensive industry expertise, Collect Rx, Inc. helps providers increase revenue, save time, and improve the bottomline.

For more information call (301) 230-2440 or visit www.collectrx.com

SlingShirt: A New After-Surgery Shirt

SlingShirt is a new, state-of-the-art, after-surgery shirt, specifically engineered for patients required to wear a sling. Utilizing embedded magnets, this unique, patent-pending design enables an individual to dress independently without compromising the injured arm. SlingShirt is also the perfect solution for the most critical time after shoulder/elbow surgery...helping the patient get dressed. Your recovery room staff will love SlingShirt. Free SlingShirts are available at the booth.

For more information call (561) 757-8812 or visit www.slingshirt.com

Augustine Temperature Management: Air-free HotDog Patient Warming

The key to effective warming is surface area. HotDog is the only product warming from above and below the patient at the same time, offering tremendous versatility and effectiveness. A recent study found HotDog warmed significantly faster than forced-air warming when all other relevant variables were held constant in a prospective, randomized controlled trial. Over-the-body blankets and underbody mattresses are warmed by a flexible, semi-conductive polymer fabric that directs heat toward the patient, not wastefully around the room, which is a proven vector of contamination. HotDog is effective, air-free and reusable. Eliminate costly disposables and maintain normothermia for all patients.

For more information call (888) HD-Warms or visit www.hotdogwarming.com
Cincinnati Sub-Zero's WarmAir® convective warming system is a compact and quiet unit that delivers gently moving warm air. The unique patented design of the FilteredFlo® blankets minimizes air currents that may spread contaminants to your patients. All air is filtered through the WarmAir® unit and the FilteredFlo® blanket, offering bacterial filtration of air before it comes in contact with the patient. With built-in safety monitoring systems, caregivers will be alerted if the temperatures exceed or fall below temperature settings, providing further protection to your patient. The CSZ WarmAir® and FilteredFlo® combined are intended to prevent hypothermia and/or reduce cold discomfort before, during, and after surgical procedures.

Advanced Optisurgical QuickRinse

Rinsing your phaco handpiece is so much easier...

...with the QuickRinse® from Advanced Optisurgical, Inc. Compact and simple to set up and operate, the QuickRinse® can be used to rinse Phaco and I/A handpieces, cannulas, vit cutters, reusable tubing and other instruments with lumens. The QuickRinse® easily meets Phaco handpiece manufacturer rinsing requirements for fluid and air volume, and provides consistent rinsing pressure regardless of the operator. Using the QuickRinse® will eliminate hand fatigue and potential hand injury caused by repetitive syringe use.

For more information call (800) 576-1266 or visit www.optisurgical.com

One Medical Passport

Delivering exceptional care starts with nurses, doctors and their patients all having access to the information they need, when they need it. But with medical facilities on one information system, doctors’ offices on other systems, and patients with no access to any of them, this can pose quite a challenge.

That’s where One Medical Passport’s solution comes in. We connect patients, doctors and medical facilities securely via the cloud throughout the continuum of care to get the right information to the right people at the right time. This year, One Medical Passport will enable 2.5 million patients, 20,000 physicians and 700 facilities to connect for better care-experiences. Contact us at (800) 540-7527 or www.onemedicalpassport.com
JCB Laboratories - Fagron Sterile Services

JC B/Fagron Sterile Services (FSS), a new 503B Human Drug Outsourcing Facility utilizing innovative features never before seen in the sterile compounding industry, is the next generation of compounded sterile production for Ophthalmic • Pain • Dialysis • Drug Shortages • IV Admixture.

Our NEW 50,000-square-foot facility, among the largest in the country, will deliver the highest level of safety by combining JC B’s experience and quality culture along with custom robotic equipment, unidirectional flow of products and personnel, and individual production suites. It also features closed-system sterile filling machines, continuous environmental monitoring of all areas of production and redundant operating systems.

You and your patients deserve nothing less. Visit JC B/Fagron Sterile Service (FSS): www.JCBlabs.com

Chronica Medical

Cumulus: We don’t add to your cost, we share in your savings.

Cumulus System is the only back-end OR inventory reconciliation machine designed to reduce billing errors and provide 100% visibility for day-to-day operations. Cumulus scans pharmaceuticals and surgical materials used in each case and creates a database used to draw up reports of what, where, by whom and who used it. Controlled substances and vials with leftover drugs are kept locked inside of the machine and recorded awaiting pickup until an authorized staff member deals with them accordingly. Cumulus found that anywhere from 3-5% of all drugs yearly go undocumented. By addressing this margin of error, hospitals save significant amounts of money starting immediately after installation.

AIV PowerMATE® Special Purpose Relocatable Power Tap

The PowerMATE® from AIV is the only pole-mounted power tap rated to UL 1363A for use in patient care areas. The PowerMATE® comes in several 15-amp models and one 20-amp model to suit your specific regulatory and power relocation needs.

More information on the AIV’s PowerMATE® can be found on our website at www.aiv-inc.com, or by calling (888) 656-0755
Silentia Privacy Screens
Silentia's product range consists of a patented privacy screen system designed for hospitals and other care situations. A Silentia Screen preserves patient privacy without preventing staff from having a good overview or keeping the daylight out. Silentia's products are easy to handle and clean, making them optimal whenever high hygiene standards are required. With the purpose of being able to meet every possible care situation, the products are available in a wide range of heights, lengths, combinations and colors, as well as various flexible designs. For example, depending on the circumstances, the customer can choose between fixed and folded screens, wall mounted or mobile.

For more information visit [www.silentia.us](http://www.silentia.us)

Codonics - SLS Medication Management Safety System
The standard of care in the world's leading ORs, Codonics SLS Medication Management Safety System enhances workflow and standardizes best practices for syringe preparation and labeling. Safe Label System (SLS) is an award-winning, easy-to-use solution that incorporates barcode technology at the point of care to identify and validate a drug in hand. A quick swipe of the Manufacturer's bar-code (NDC) on SLS provides immediate visual and audible identification, helping you eliminate medication errors, improve patient safety and ensure consistency and compliance every time a drug is prepared. SLS automatically creates a ready-to-apply, full-color medication label that includes drug name, concentration, dose, volume, diluent/dilution, preparation and expiration date and time, prepared by information and any warnings or messages about the drug, meeting requirements of TJC, APSF, ASA and USP. SLS labels also include a 1D/2D bar-code for integration with AIMS and EHR. Integrates with anesthesia carts from the leading manufacturers.

Nuvo - Surgical Lights
What makes Nuvo different? Nuvo founded the company on the idea of building high quality, affordable surgical lights in the USA. For nearly 40 years we have been doing just that. Manufacturing state-of-the-art surgical, procedure and exam lights in the USA. Stop by our booth to discuss your lighting needs.

Experience the Nuvo difference…Lighting is what we do.

For more information call (800) 663-1152 or visit [www.nuvosurgical.com](http://www.nuvosurgical.com)
**104 Leica - Proveo 8**

Explore the wide range of surgical microscopes optimized for outpatient surgery, supporting surgeons in ophthalmology, spine, otolaryngology, plastic reconstructive, neurosurgery and more. The recently introduced Proveo 8 ophthalmic microscope goes beyond conventional visualization using the breakthrough innovations of FusionOptics and CoAx4 Illumination. Its exclusive optical technology provides surgeons with stable red reflex even during phacoemulsification, and a texture-rich image from the edges of a detached membrane to the periphery of the retina.

Leica Microsystems’ surgical microscopes are designed with input from surgeons to meet evolving needs, create unique value, and help improve patient outcomes. Find the perfect fit for your operating or exam room, customized to meet your needs.

For more information, call (800) 248-0123 or visit www.leica-microsystems.com/products/surgical-microscopes/.

**219 The Joint Commission**

The Joint Commission’s Ambulatory Care Accreditation Program offers a variety of options to meet the needs of today’s ASCs: Accreditation for patient safety processes, certification for ASCs serving Medicare patients and Advanced Total Hip and Total Knee certification for surgical care providers. Accrediting over 2,100 ambulatory care organizations, The Joint Commission can help you reduce risk and create a culture of excellence that illustrates your commitment to safe, high-quality care as well as offers access to proven, customized solutions to improve patient safety.

For more information call (630) 792-5286 or visit www.jointcommission.org/ASC

**302 Get a One-Two Combo for your O.R.**

Knock out most of your surgical protection needs with just two gowns: HALYARD BASICS® and AERO BLUE® Performance Gowns. Visit Halyard Health at OR Excellence to see how the I-2 Combo of AERO BLUE®—the most protective and comfortable AAMI 3 gown in the market—and HALYARD BASICS® can simplify gown management while keeping your team protected in 80% or more of surgeries.

Formerly Kimberly-Clark Health Care, Halyard is committed to preventing HAs and helping patients move from surgery to recovery. For half a century, we’ve led the industry in innovation for hospitals, surgery centers and healthcare professionals.

For more information, visit www.halyardhealth.com
EIZO’s CuratOR surgical solution is our newest operating room video management system that allows quick access to multiple image sources and flexible arrangement across different monitors. Different workflow scenarios can be predefined and recalled on demand with the simple touch of a touchscreen.

Our video management solution is highlighted by our RadiForce LS580W, a 58-inch, 4K, 8-megapixel monitor with the capability of displaying multiple medical images simultaneously.

We will also be showcasing our new EZ1000 mobile tower which provides an alternate turnkey option to costly ceiling suspension. Sleek design and easy maneuverability enables use in multiple rooms. The EZ1000 was created to seamlessly support our family of large format surgical displays and monitor managers.

For more information call (800) 800.5202 or visit www.eizo.com

CareWire is a text-first, mobile patient engagement program. We communicate with patients, in their primary language, at the exact time they need to do or know something. Every interaction begins with a text message and can include embedded links guiding patients to your website, online medical history programs, patient portals, directions, etc. Messaging occurs both pre and post-procedure and prompts patients to provide their medical history, notifies patients of copayments or deductibles, instructs patients what time to arrive and what to bring with them, and reinforces NPO or special preparation instructions. Messages also solicit feedback on their recovery and experience.

For more information, call (888) 744-8950 or visit carewireinc.com.com

NBSTSA provides professional certification of surgical technologists (CST) and surgical first assistants (CSFA), thus promoting quality patient care. NBSTSA’s vision is to operate independently in the global community as the essential provider of credentialing services for perioperative professionals.

Typenex Medical Fluid Management Products

Operating rooms are often faced with the challenge of providing high-quality patient care while simultaneously reducing costs and adhering to safety precautions.

Typenex® Medical’s absorbent floor mats, floor suction devices, and suction manifolds are designed to efficiently manage fluid-intensive cases in the operating room while minimizing costs. Typenex Medical can similarly help minimize spend, clean-up, and follow-ups by educating clinicians on proper wound drain selection and providing cost effective emesis bags.

Typenex Medical offers a focused product portfolio to help manage fluids in the perioperative setting. Through a combination of cost-conscious and effective products, your facility can confidently face these challenges.

For more information, visit us at www.typenexmedical.com

PharMEDium Sterile Compounding

PharMEDium is the nation’s leading provider of pharmacy-outsourced, ready to use sterile compounded preparations. Highly trained and qualified personnel adhere to rigorous quality standards and applicable cGMPs using only FDA-approved and allowed sterile drugs and FDA cleared sterile containers in our preparations. PharMEDium, a part of AmerisourceBergen, serves over 3,000 acute care hospitals and ambulatory surgery centers through our state-of-the-art 503B Outsourcing Facilities, which are registered with the FDA and licensed by the states. As a trusted partner, PharMEDium reliably and consistently works to meet our customers’ need for customized, ready to use admixtures for critical medication therapies.

Collect Patient Deductibles at Time of Treatment

When patients need care but are unprepared to pay a high deductible and coinsurance, collecting their out-of-pocket expenses at the time of treatment can be challenging and stressful. CareCredit can help. Patients will feel better knowing they have the option to pay monthly with promotional financing. And you will feel better knowing you can increase cash flow while decreasing A/R. CareCredit is easy to use. Patients can apply onsite with a mobile device, computer or over the phone and will receive a credit decision instantly. It’s a win-win for both you and them. Call 866-246-6479 for more information or to apply to enroll at no cost today!

*Subject to credit approval. Minimum monthly payments required. See carecredit.com for details.
Advance Medical Designs

Advance Medical Designs lives up to its name and mission when you seek innovative infection control products and solutions for surgical procedures. We are a leading manufacturer of disposable infection control products for the operating room.

- Sterile disposable equipment covers for most makes and models of surgical equipment to include C-arm drapes, microscope drapes, ultrasound probe covers, camera covers, banded bags and dome covers, urology drain bags, fluid decanters.
- ART room turnover infection control systems designed and customized to enhance infection control protocol and turnover times. Systems may include disposable impervious OR table linens, bags, wipes and mops. Inquire about the generous value-added-goods packages that accompany the ART program to include hampers and gel patient positioners/pads.

Jani-King

Healthcare Cleaning: Infection control and meeting regulations

More and more state governments are passing laws on hospital cleaning requirements and facility infection rates in outpatient settings. Consumers of healthcare are demanding improved hospital cleaning when receiving patient care in all healthcare settings.

We understand the critical nature of healthcare surface disinfection and assisting in preventing HAI’s. The Jani-King healthcare cleaning services program ensures proper disinfecting and best practices that exceed the toughest healthcare cleaning standards and regulations.

Jani-King’s Healthcare Cleaning program is based on the best practices from organizations including the Association for the Healthcare Environment (AHE), Association for Professionals in Infection Control and Epidemiology (APIC), Association of peri Operative Registered Nurses (AORN), and the Centers for Disease Control and Prevention (CDC).

MST Medical Surgery Technologies, Ltd.

AutoLap™ is the only image-guided robotic laparoscope positioning system, interacting with the surgeon's movements in the surgical cavity to guide its robotic laparoscope positioner in real time. It offers the surgeon full and natural control of the surgical procedure and an optimal field of view. While reducing surgeon distraction, the system can obviate the need for a camera-holding assistant. The system seamlessly controls the laparoscope's movement, reducing cognitive load and distraction. Features include automatic zoom correction, camera horizon correction, and tissue collision warnings. AutoLap™ is a cost-saving surgical robotics system. It does not require extensive training and can be used with currently available surgical imaging systems and equipment. The compact system is easy to set up and transport between ORs.

Meditators

ADVANTAGE® PLUS Endoscope Reprocessing System

The MEDIVATORS® Advantage® Plus is a fully automated, computer-based asynchronous endoscope reprocessor. The MEDIVATORS Advantage Plus endoscope reprocessor monitors each endoscope channel separately for blockage and proper flow ensuring complete high-level disinfection. A computerized detection system eliminates human error in the selection and connection of hook-ups. Tracking endoscope usage and viewing cycle logs is super-easy with the on-board data management. Our single-use, environmentally friendly Rapicide PA High-Level Disinfectant used at a low 30°C temperature saves time and ensures compatibility. Use of the automated wash cleaning cycle with Intercept Detergent ensures every endoscope channel is cleaned in a reliable and repeatable method, complying with established AAMI cleaning benchmarks and guidelines. Continuous automated leak testing and a programmable alcohol flush are standard attributes.

Metrex

Metrex offers a system of solutions designed to address cross-contamination and help reduce healthcare associated infections (HAIs) across each of the 7 critical touch points within the Circle of Care™. Each one of our hard surface disinfectant families – Caviwipes™, CaviWipes 1™, CaviWipes™ AF – offer the same formulations in wipes and ready to use liquids/sprays. Reducing the number of chemicals assists with staff training, helps with staff and patient exposure to chemicals and can help consolidate the number of manufacturers in your facility. Trust your facility to the brand of surface disinfectants that thousands of healthcare facilities have trusted every day for over 30 years…Metrex surface disinfectants.

www.metrex.com
Silikal America

Silikal healthcare flooring is hygienic, seamless and non-porous, thus bacteria and other microbes have nowhere to hide and nothing to fasten to. Silikal resists stains that are sometimes created by healthcare related chemicals or liquids like betadine, blood, urine, and silver nitrate. Silikal also reduces maintenance needs; for example, buffing and waxing are not required. Silikal flooring is durable and slip resistant. Silikal installs fast, reducing and even eliminating downtime. Applications are endless: Operating Rooms, Kitchens, Dialysis, Bathrooms, Sterile Processing, High Traffic Corridors, Patient Rooms, Laboratory, Elevators, Laundry Room, Pharmacy, Dish Room, Morgue, Loading Dock, Showers, Trash Room and so much more.

The no-downtime floor that lasts a lifetime.

www.silikalamerica.com

Christie Medical

VeinViewer® by Christie is clinically proven to increase PIV first-stick success by up to 100%, reduce PICCs placed due to difficult vein access by 30% and increase patient satisfaction by 100%. Utilizing harmless near-infrared light, VeinViewer projects a high definition image of patient veins directly on their skin, improving site selection. With VeinViewer, clinicians can quickly locate additional access options, visualize valves and bifurcations and assess refill rate in real-time. With more clinical evidence than any other vein visualization device, VeinViewer is the world’s trusted leader.

Arthrex Booth 101

As an innovation leader in sports medicine and less invasive orthopaedics, Arthrex highlights the latest cutting edge technology and advancements in orthobiologics, arthroscopic surgery, trauma, distal extremities and next generation arthroplasty. Arthrex is a privately-held company committed to delivering uncompromising quality to the healthcare professionals who use its products and the millions of patients whose lives are impacted. Experience Arthrex at its best in its mission of helping surgeons treat their patients better. For more information, visit www.Arthrex.com.

www.arthrex.com

Augustine Temperature Management Booth 204

Warm patients safely during orthopedic implant surgery with air-free HotDog Patient Warming. Nine published studies link forced-air warming to increased airborne contaminants around the surgical site, leading to increased infection risks in orthopedic implant surgery. Many facilities have discontinued warming during orthopedic surgery, but hypothermia can lead to many other negative outcomes. HotDog – with its patented semi-conductive fabric technology – is the safe warming alternative. It’s the only patient warming system that warms from above and below the patient simultaneously, resulting in a more versatile, more effective warming solution. As a reusable warming system, it is less expensive than single-use forced-air warming.

www.hotdogwarming.com

BD Booth 109

BD is a leading medical technology company that benefits countless lives worldwide. We advance health by improving the ways that discovery, diagnostics and delivery of care are conducted. With 45,000 employees at work in more than 50 countries, we work in close collaboration with customers and partners to develop innovative products and solutions that enhance outcomes, better manage healthcare delivery costs, increase efficiencies, improve healthcare safety, and expand access to health. Because we’ve been doing this for over 100 years, our portfolio, leadership and partnerships make a difference for global healthcare.

PharMEDium Booth 209

PharMEDium is the nation’s leading provider of pharmacy-outsourced, ready to use sterile admixture services. Our total commitment to advancing patient safety is embodied through first-in-class labeling, packaging and cutting-edge bar code scanning technology designed to help reduce the potential for medication errors. Founded in 2003, PharMEDium serves over 3,000 acute care hospitals and ambulatory surgery centers through our state-of-the-art 503B Outsourcing Facilities, which are registered with the FDA and licensed by the states. Highly trained and qualified personnel adhere to rigorous quality standards and applicable cGMPs using only FDA-approved sterile drugs and FDA cleared sterile containers in our preparations. As a trusted partner, PharMEDium reliably and consistently meets our customers’ need for customized, ready to use admixtures essential to their on-going operations.

Schaerer Medical

Schaerer Medical Booth 106

Schaerer Medical manufactures and distributes specialty surgical tables and accessories. We offer a variety of surgical tables for orthopedics, urology, vascular, pain management, spine and general surgery. The Chick Low Profile, Schaerer 7300 modular table and Rotex table extension provide our customers with multiple solutions for fracture repair and DAA hip replacement. The Schaerer 7300 table is perfect for surgery centers and provides excellent flexibility to meet multiple specialties with one table…you accessorize it to meet your needs. The Schaerer Carbon Spine Frame converts our 7300 modular table into an open spine frame quickly and easily, requiring little storage space when not in use.

Southmedic

Southmedic manufactures a family of “Dynamic Tissue Systems” used to manage wounds that are complicated by uncontrolled retraction. Inherent viscoelastic properties of tissue increase the difficulty and time to definitive closure. DTS applies a gentle, unrelenting dynamic appositional force that counters the retraction forces that make open wounds complicated to manage. “Every patient deserves to have their wounds result in primary closure.” DTS provides the primary closure option for many more patients!

Urgent Surgery Solutions, Inc.

Urgent Surgery Solutions is a family-owned, full-service provider in the wholesale, distribution and sourcing of pharmaceutical products and services. We are a nationwide specialty distributor serving facilities across the country, including ASCs, hospitals, long term care facilities and individual physicians. As our name implies, we specialize on the needs of surgical facilities across a full range of specialties, from ENT, eye care and general to endoscopy and orthopedics. In addition, we assist with “hard-to-find” medications that are in shortage with the manufacturer. We are able to do this because of our unique network of manufacturers and other distributors. Our valued customers can always expect to receive trusted FDA approved pharmaceuticals while benefiting from our small business values.

Typenex Medical

Typenex Medical seeks to help healthcare providers deal with the challenge of providing higher levels of care while simultaneously reducing costs. We aim to develop new processes that create consistency and efficiency, protect the hospital from liability, and deliver the highest quality of care. One vital aspect to success in the operating room environment is the safety experienced by both the patient and surgical team. Typenex Medical supports your efforts to minimize cross-contamination and maintain patient safety with products that assist in the efficient turnover of your operating room.

Learning Made Fun!

Surgery facility managers said last year’s ORX meeting was one of the most fun and interactive conferences they’d ever attended. A big reason was the interactive audience-response system. These easy-to-use devices empower you to give speakers live feedback during presentations with just a push of a button. Presenters ask the audience questions during each seminar, with the results anonymously beamed live to the screen for all to see. You learn not only from the presenters, but from each other. Interactive learning is fun learning! Here’s what surgical leaders said about ORX’s interactivity:

“Really liked interactive answering to see how we stacked up or compared. It was a great tool.”

“The audience response system was great!”

“The interactive response card was fun and engaging.”

“The audience interaction is great; it’s good to see instant feedback on topics.”

“Learning was made fun!”
Pamper yourself while soaking up tons of great ideas at OR Excellence 2017, at Nevada’s gorgeous Red Rock Casino, Resort & Spa, October 11-13, 2017.

You'll learn new skills, network with colleagues and get tips on improving outcomes, expanding your caseload, growing more profitable, protecting your employees and assets and more, all in an innovative and interactive learning format. Visit www.orexcellence.com for more details, or dial (888) YOUR ORX.
